

## Model for Discipleship

1. **Jesus** (How does the Jesus we believe in - and the gospel we preach - determine the kind of person that we become and the kind of disciples that we make?) – by Bill Hull.
2. **Intentionality** (disciple makers need a plan when they disciple people - they need to know where they are going) – by Robert Coleman.
3. **Relationships** (discipleship – following the example of Jesus – needs to be grounded in relationships, or what are referred to as relational environments) – by Jeff Vanderstelt.
4. **Bible** (the content for discipleship is found in the Bible, it is the instruction manual) – by Francis Chan.
5. **Path** (disciples follow a discernible, but crooked growth path. Their life story – in following Jesus – will have similar chapters) – by Jim Putman.
6. **Multiply** (discipleship is only complete with reproduction and multiplication – when the disciple becomes a disciple maker himself) – by KP Yohannan.
